Re: Environmental Impact Assessment (EIA) for the Replacement of the Mactaquac Provincial Park Wastewater Treatment Lagoon, Mactaquac, NB

To Whom it may concern:

On behalf of the Conservation Council of New Brunswick (CCNB), please accept the attached submission as part of the Environmental Impact Assessment (EIA) for the Wastewater Lagoon Replacement at Mactaquac Provincial Park. We thank the Department of Tourism, Heritage and Culture (THC) for conducting an environmental impact assessment (EIA) for the replacement of the aging Mactaquac Provincial Park Wastewater Treatment Lagoon in Mactaquac, New Brunswick.

The Conservation Council of New Brunswick recognizes the opportunity for improvement regarding the Wastewater Treatment Lagoon at Mactaquac Provincial Park. Nevertheless, it is imperative that the proposed project diligently examines and addresses any potential risks inherent in both the construction and operational stages.

Attached are the Conservation Council's comments to the EIA which include suggestions and points to consider for the next step of the EIA process.

Please get in touch with me if you would like to discuss our submission in detail.

Sincerely,

A handwritten signature in cursive script, reading "Beverly Gingras".
